**Exam : CLOUDF**

**Title : EXIN Cloud Computing  
Foundation**

**Version : DEMO**

- 1.What is a specific feature of Network Attached Storage (NAS)?
- A. NAS presents data to the user as if it is stored on a file server
  - B. NAS uses the file system of the client computers.
  - C. The NAS operating system does not provide security features.
  - D. With NAS the file system is managed by the servers storing the data.

**Answer: A**

- 2.What is OpenID used for?
- A. to connect to multiple web-sites without using a password
  - B. to identify yourself in dealing on-line with government agencies
  - C. to pay on-line via your own bank account
  - D. to use one account to sign in to multiple web sites

**Answer: D**

- 3.How can moving to Cloud computing increase user satisfaction?
- A. by accomplishing quick and efficient release of applications
  - B. by increasing the access to information available on the Internet
  - C. by moving internal systems with performance problems to the Cloud
  - D. by passing problems with applications to the Cloud provider

**Answer: A**

- 4.Why became the Ethernet standard popular for Local Area Networks (LANs)?
- A. because the Ethernet standard was fastest
  - B. because the Ethernet standard was released for general use
  - C. because the Ethernet standard was suitable for mainframes
  - D. because the Ethernet standard was used by the largest vendor

**Answer: B**

- 5.What is an example of the use of location information?
- A. to determine the user's native language
  - B. to determine whether the user is connected via a mobile platform
  - C. to provide advertisements for local restaurants, determined by GPS
  - D. to provide the correct version of the application for the user's operating system

**Answer: C**

- 6.What is the generally accepted communication protocol on the Internet?
- A. Net BIOS
  - B. OSI
  - C. SNA
  - D. TCP/IP

**Answer: D**

- 7.What is an economic cloud solution for a short term project like a one time application design?
- A. Platform-as-a-Service

- B. Software as-a-Service
- C. Communication-as-a-Service
- D. Security-as-a-Service

**Answer: B**

8.What may be an economic benefit of Cloud computing?

- A. a custom accounting system
- B. acceptance by employees
- C. purchasing thin clients
- D. reduced overhead

**Answer: D**

9.What does the integrity of information mean?

- A. It means that the access to the information is limited.
- B. It means that the information can be accessed by those users who are allowed to access it.
- C. It means that the information is accurate.
- D. It means that the information is protected.

**Answer: C**

10.What is a main challenge for enterprises in using cell phones for collaboration?

- A. Applications for collaboration are limited.
- B. Collaborative applications are complicated.
- C. Employees want to use their private cell phones.
- D. Separating business data from personal data.

**Answer: D**

11.What is the principal function of the Hypervisor?

- A. identity management
- B. responding to client requests
- C. scheduling the sharing of resources
- D. virus protection

**Answer: C**

12.How can a protocol analyzer be used?

- A. to analyze errors in the protocol syntax used in a failed message
- B. to distribute messages according to the addressing protocol they use
- C. to measure the bandwidth required for different types of transactions
- D. to prevent virus infections in the network software

**Answer: C**

13.What is specific for public cloud?

- A. It is a client computer connected to a network.
- B. It uses both local and remote services in its implementation
- C. It uses services provided by an external service provider.

D. The services are shared in the organization.

**Answer: C**

14. Why is a thin client called 'thin'?

- A. because it has a thin monitor
- B. because it has limited functionality
- C. because it has no memory
- D. because it has no processor

**Answer: B**

15. Providing a user access to an application in the Cloud requires several steps. In which step are the user's permissions determined?

- A. during the auditing phase
- B. during the authentication phase
- C. during the authorization phase
- D. during the verification phase

**Answer: C**

16. What was a serious drawback in the early development of networks?

- A. computers being dedicated to one function
- B. computers were too complicated to be connected
- C. the low speed of the network
- D. vendors developing their own network communication protocols

**Answer: D**

17. Why is text messaging in automobiles outlawed in many countries?

- A. for financial reasons
- B. for safety reasons
- C. for security reasons
- D. for synchronization reasons

**Answer: B**

18. In evaluating a Cloud service provider, which security issue is important?

- A. how the service provider implements and maintains security
- B. the compatibility of the virus scanners used by the vendor and in your organization
- C. the protection provided by your organization's firewall
- D. the security protocols used by other customers of the services

**Answer: A**

19. What is the main tool for users accessing the Cloud?

- A. remote desktop
- B. the firewall
- C. the web-browser
- D. the web-server

**Answer: C**

20.What is the most important feature of a virtualized environment?

- A. Multiple applications can be used by a single user.
- B. Multiple computers can be connected to a single network.
- C. Multiple operating systems can be used on a single hardware platform
- D. Multiple users can be active on a single network.

**Answer: C**
